

This guide will walk you through the process of setting up a myDEQ account and submitting a Notice of Intent (NOI) for stormwater discharge authorization under Arizona's Construction General Permit.

1. Setting Up Your myDEQ Account

Who needs to register?

A person listed on your Arizona Corporation Commission file (the Responsible Corporate Officer, or RCO) must set up the myDEQ account. This person has the legal authority to bind the organization.

Registration Steps:

1. Go to azdeq.gov/mydeq
2. Click "Request Account"
3. Verify your identity online (or by mail if needed)
4. Choose a password and security questions
5. Authorize additional users if needed (see User Roles below)

User Roles at a Glance

RCO (*Responsible Corporate Officer*)

Main account holder. Has legal authority to bind the organization.

DRO (*Delegated Responsible Officer*)

Acts on RCO's behalf. Requires notarized Signature Agreement.

Submitter

Submits compliance reports. Requires notarized Signature Agreement.

Data Entry

Prepares data for others to submit. Cannot submit directly to ADEQ.

2. Applying for the NOI

Once your account is set up, follow these best practices when applying:

- **Select the correct permit type:** Choose "General Construction Permit (NOI/NDC)"
- **Water discharge question:** When asked if water will run off the site into US tributary waters, select **YES**. Selecting "No" or "Unknown" generates an NDC certificate, which must be canceled before you can reapply for the NOI.
- **Discharge location:** Use the overlay map to place your cursor on the lowest point of the job site where water

runoff could occur. The system will generate the latitude/longitude coordinates.

- **MS4 selection:** Select the city where the job site is located.
- **Receiving water body:** Enter the name of the nearest body of water. If unknown, use the dropdown menu to select "Unknown" or "Unnamed."
- **SWPPP review:** You will NOT need to have the SWPPP reviewed through myDEQ.
- **Site contact information:** Provide the name, phone number, and email for the superintendent or person responsible for the site on a daily basis.
